

Shihabun Mobin Jisan

Full Stack Web Developer

I'm a full stack web developer who loves to create amazing websites and applications. I have more than two years of experience in using Laravel, React, My SQL, and JavaScript to build dynamic and responsive web solutions. I also have a passion for graphics designing and can create stunning visuals for your projects.

PERSONAL PROJECTS

School Management System in Laravel (06/2023 - 07/2023) [🔗](#)

- I designed and implemented a secure and efficient payment system that enabled the collection of various fees, such as registration, monthly, and exam fees, from the users.
- I developed an API project that allows users to select and retrieve the data they need from a database. The project uses a RESTful architecture and JSON format to communicate with the clients.
- I built a registration feature that enables student and teacher sign-up. The system automatically generates a roll number for each student and a unique ID for each employee. The users can log in using their assigned credentials.
- I developed an accounts management system that enables the payment of employee salaries and the monitoring of their salary status. The system also allows the client to view and add other expenses related to the project.

Single Page Application (Blog - VUE JS) (07/2023 - 08/2023) [🔗](#)

- I designed and developed a frontend blog application with various features and sections. The application allows users to create, edit, and delete articles on different topics and categories.
- The project uses Google Firebase as the authentication service. The project allows users to sign in with their email and password.
- The project also has a simple CRUD system for managing categories of data. The users can create, read, update, and delete categories as per their needs. The project is secure and efficient.

Question & Answer (Laravel - VUE JS) - Running (08/2023 - Present)

- Voting System, Full Stack Application, Autentication

WORK EXPERIENCE

Computer Trainer Silicon Institute of Technology

01/2023 - 04/2023

Cox's Bazar

Achievements/Tasks

- Completed a computer training program in 2 months successfully.
- I acquired leadership skills from this institute and learned how to manage projects and handle new clients.
- I gained skills in event planning and computer hardware from this institute.

SKILLS

Laravel - (5 projects)

React (5 projects)

VUE JS (4 projects)

My SQL (2 years)
